CM Space Applications

- Results - Comments

Overall Performance:

The Common Module Space Applications for Security and Defence (SASD) delivered a high-quality educational experience with its diverse content, expert instructors, and international atmosphere. Despite some weaknesses, such as repeated material and limited interactivity, the strong positive feedback reflects the module's success in achieving its objectives. By addressing the identified areas for improvement, the module can further enhance its impact and continue to provide valuable learning opportunities for future participants.
